

U.S. Department
of Transportation
**Research and
Special Programs
Administration**

400 Seventh St., S.W.
Washington, D.C. 20590

DOT-E 10885
(SIXTH REVISION)

DEC 13 2001

EXPIRATION DATE: October 31, 2003

(FOR RENEWAL, SEE 49 CFR § 107.109)

1. GRANTEE: Department of Energy
Washington, DC

(See Appendix A to this document for a list of additional grantees and expiration dates)

2. PURPOSE AND LIMITATION:

a. This exemption authorizes the transportation in commerce of certain explosives that exceeded the quantity limitation or are forbidden for transportation by air. This exemption provides no relief from the Hazardous Materials Regulations (HMR) other than as specifically stated herein.

b. The safety analyses performed in development of this exemption only considered the hazards and risks associated with transportation in commerce.

3. REGULATORY SYSTEM AFFECTED: 49 CFR Parts 106, 107 and 171-180.
4. REGULATIONS FROM WHICH EXEMPTED: 49 CFR § 172.101 Column 9(B), § 172.204(c)(3), § 173.27 (b)(2) and (3), § 173.27 (f) Table 2, § 173.56(d) and (e), § 175.30(a)(1), and § 175.320(a), except as specified herein.
5. BASIS: This exemption is based on the application of Department of Energy dated October 31, 2001, submitted in accordance with § 107.109.
6. HAZARDOUS MATERIALS (49 CFR § 172.101):

Hazardous materials description -- proper shipping name	Hazard Class/ Division	Identi- fication Number	Packing Group
Division 1 explosives under specific commodity name or generic description, as appropriate	As appropriate	As appropriate	As appropriate

DEC 13 2001

7. SAFETY CONTROL MEASURES:

a. PACKAGING - The explosives must be classified, packaged, marked and labeled in accordance with the Hazardous Materials Regulations (49 CFR Parts 171-180) and/or the appropriate International Civil Aviation Organization's (ICAO) Technical Instructions.

b. OPERATIONAL CONTROLS -

(1) The explosives will be transported aboard aircraft which are owned by the Department of Energy (DOE) but operated by Ross Aviation Incorporated's personnel under contract with the DOE.

(2) Explosives carried under the terms of this exemption must be authorized to be transported by common carrier by highway under 49 CFR Parts 171 through 180.

(3) Shipment of the explosives must comply with the hazardous materials procedures from DOE Albuquerque Field Office's Aviation Operations Manual and Ross's General Safety Manual which establishes its policy to conduct operations in a manner that protects the health and safety of employees, contractors, and the environment. In addition, a full-time DOE Aviation Safety Inspector, possessing qualifications parallel to those of an FAA Aviation Safety Inspector, is located at the Albuquerque Field Office and conducts surveillance of daily operations. DOE Headquarters must also conduct periodic inspections and review programs relating to Ross's Safety Program.

(4) Maximum weight. Not more than 2,000 pounds total net weight of explosives may be carried in the aircraft.

(5) Authorized persons aboard aircraft. No person other than a required flight crewmember, an FAA or DOE inspector, the shipper or consignee of the material or a representative of the shipper or consignee so designated in writing, or person necessary for handling the material may be carried on the aircraft.

(6) Advance permission from airport. The operator of the aircraft must have advance permission from the owner or operator of each manned airport where the material is to be loaded or unloaded or where the aircraft is to land while the materials are on board. When the destination is changed after departure because of weather or other unforeseen circumstances, permission from the owner or operator of the alternate airport must be obtained as soon as practicable.

(7) Flight plan. The operator of the aircraft must include the following information in the "Remarks" section of each flight plan when the provisions of this exemption are exercised:

(i) The classification of each hazardous material aboard the aircraft.

(ii) The net weight of each class of hazardous material aboard the aircraft.

(8) Loading and unloading. Loading and unloading operations under this exemption must comply with the following:

(i) The loading and unloading of the aircraft must be conducted at a safe distance from heavily populated areas and from any place of human abode or assembly. However, at an airport where the airport owner or operator or authorized representative thereof has designated a specific location for loading or unloading, the explosives may not be loaded or unloaded at any other location.

(ii) The explosives must be loaded, transported or stored as provided in § 177.848 except that blasting caps (with or without fuses), including electric blasting caps, may not be loaded and carried in the same aircraft with any other Division 1.1 or 1.2 explosive.

(iii) The loading arrangement to be used aboard the aircraft must be prepared by the DOE.

(iv) During loading or unloading, no person may smoke, carry a lighted cigarette, cigar or pipe, or operate any devices capable of causing an open flame or spark within 50 feet of the aircraft.

(v) No fueling operations of the aircraft may be done during loading and unloading of the explosives.

(9) Requirements during operation of aircraft.

Operation of the aircraft during takeoff, en route, and landing must be conducted at a safe distance from heavily populated areas.

(i) Before movement of the aircraft prior to take-off, the pilot of the aircraft must notify the control tower of the class(es) of explosive(s) (including ammunition) on board.

(ii) The pilot of the aircraft, prior to entering an airport traffic area, must notify the control tower of the amount and class of explosives on board and request this information be relayed to the appropriate airport officials. For airports without control towers, this call must be made to the Flight Service Station nearest the airport of intended landing.

(iii) When under radar control during the approach and landing phase, the pilot must request appropriate vectors so as to avoid heavily populated areas.

(iv) Whenever explosives are on board the aircraft, the pilot must ensure that no person on the aircraft may smoke, or operate any device capable of causing an open flame or spark.

(10) Pilot requirements. The operator of the aircraft must ensure the following with respect to pilots of aircraft operating under this exemption:

(i) A minimum of two pilots is required aboard any multi-engine aircraft carrying explosives under this exemption.

(ii) Each pilot of the aircraft must be provided written instructions stating the conditions and limitations of the operations being conducted and the name of the official(s) granting the advance permission required by paragraph (g) above except when a landing permit has been granted by an agency of the Department of Defense for landing at a military installation.

(iii) Each pilot of an aircraft being operated under this exemption must have received formal training on the requirements of 49 CFR Parts 171-178 that are applicable to his duties and be thoroughly familiar with the specific requirements of this exemption.

(11) Attendance of explosives. Division 1.1, 1.2 and 1.3 explosives must be attended at all times that they are in the possession of the operator (from the time of receipt from the consignor until time of receipt by the consignee) unless placed in an explosive storage magazine that is approved by the Federal, State or local authority or at a location on a military installation designated by appropriate military authorities.

8. SPECIAL PROVISIONS:

a. MARKING - The explosives must be classified, packaged, marked and labeled in accordance with the Hazardous Materials Regulations (49 CFR Parts 170-180) and/or the appropriate International Civil Aviation Organization's (ICAO) Technical Instructions.

b. This exemption authorizes transportation of explosives in aircraft of United States registry. It does not grant authority to use foreign controlled airspace or airports outside the United States.

9. MODES OF TRANSPORTATION AUTHORIZED: Cargo aircraft only.

10. MODAL REQUIREMENTS: A current copy of this exemption must be carried aboard each cargo aircraft used to transport packages covered by this exemption. The shipper must furnish a current copy of this exemption to the air carrier before or at the time the shipment is tendered.

11. COMPLIANCE: Failure by a person to comply with any of the following may result in suspension or revocation of this exemption and penalties prescribed by the Federal hazardous materials transportation law, 49 U.S.C. 5101 et seq:

o All terms and conditions prescribed in this exemption and the Hazardous Materials Regulations, 49 CFR Parts 171-180.

- o Registration required by § 107.601 et seq., when applicable.

Each "Hazmat employee", as defined in § 171.8, who performs a function subject to this exemption must receive training on the requirements and conditions of this exemption in addition to the training required by § 172.700 through § 172.704.

No person may use or apply this exemption, including display of its number, when the exemption has expired or is otherwise no longer in effect.

12. REPORTING REQUIREMENTS: The carrier is required to report any incident involving loss of packaging contents or packaging failure to the Associate Administrator for Hazardous Materials Safety (AAHMS) as soon as practicable. (Sections 171.15 and 171.16 apply to any activity undertaken under the authority of this exemption.) In addition, the holder(s) of this exemption must inform the AAHMS, in writing, of any incident involving the package and shipments made under the terms of this exemption.

Issued in Washington, D.C.:

Robert A. McGuire
Associate Administrator
for Hazardous Materials Safety
